Students enjoyed visits from the local council rubbish truck, fire truck, police car & ambulance services. Students also visited the local café and the road safety centre to consolidate their learning.

Sgt John and Humphrey say – Road Safety around Schools Begins with You

Children do not have good peripheral vision in a busy traffic environment and can often run straight across the road without looking. If you collect your child from the school, wait near the gate, hold their hands and remember to do the kerb drill – Stop, Look, Listen & Think – before you cross the road. It is important to use a crossing if one is available and remember, parents can sometimes be inconsistent role models, which only confuses the road safety message. If you collect your child from a bus stop, it is important to wait for your child on the same side of the road where they will be getting off the bus. You should never wait on the opposite side of the road.

Whenever you cross a road with your child, tell them what you are doing and what you are looking at. It never hurts to repeat the same message – Stop at the kerb, look to your right, look to your left and look to the right again. Listen for traffic and think ... is it safe to cross here or is there a better place that I can cross? Never cross the road between parked cars or near a bend. Marked crossings are a much safer place to cross the road – a short walk to a crossing can be worth the effort.

Don't risk your child's life

Never call your child from across the road. Excited children often dash out onto the road and forget to look for traffic. Children cannot accurately judge traffic speed.
