

NAPLAN 2014 RESULTS

When looking at individual student's results it is important to remember that the NAPLAN data is one piece of information indicating a student's achievement based on tests done over three days. It stands alongside school based Student Reports, Parent-Teacher interviews, student led conferences and student work samples to give a clearer picture of how a student is developing. We allow all students to sit for the tests including students who have learning disabilities and students who have learning difficulties. Our school's results are summarised below.
